- Flexible, comfortable, portable and affordable professional skin care at home
- Customized treatment regimens based on your skin's needs

### Users love it!

I've been a huge fan of Omnilux treatments at my dermatologist's office for many years. The Omnilux Contour has far exceeded my expectations - my skin looks and feels great, and I can do the 10 minute treatment at home while I watch TV!

- Whitney

I adore it! It's brilliant as I can travel with it for work. I LOVE how my skin feels after, and it has improved my small pigmentation marks.

- Sarah

### FAQ's

#### What is Omnilux Contour™?

Based on the world's leading Omnilux Medical™ light therapy technology, Contour products are flexible, portable, affordable, FDA-cleared home use devices that use light emitting diodes (LED) to reduce fine lines and wrinkles and improve overall skin tone and health.

#### How does it work?

Optimized energy output and two clinically proven wavelengths of red and near-infrared (633nm and 830nm) of light work on a cellular level to stimulate collagen, reduce fine lines and wrinkles, and reduce the visible signs of aging and sun damage.

#### How safe is it?

Over 40 clinical studies and nearly 20 years of Omnilux experience have proven that Omnilux light therapy is very safe, with no adverse side effects, no pain and no downtime. Omnilux Contour generates no heat and is safe for all skin types.

#### What is the treatment regimen?

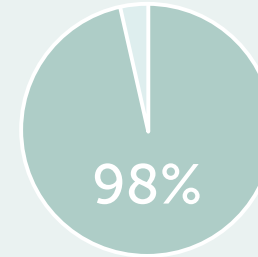

We recommend a course of treatments: 3-5 10-minute treatments per week, for 4-6 weeks. Thereafter, use as desired for maintenance.

#### Can I use it with my current skincare products?

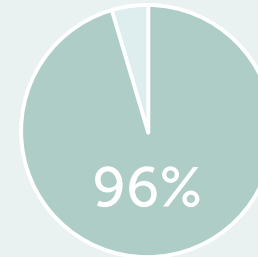

Omnilux Contour is compatible with most skin care routines. It can also be used in conjunction with other professional skin treatments such as microneedling, peels, microdermabrasion, laser treatments, injections or fillers to optimize results.

### Clinically Proven Results

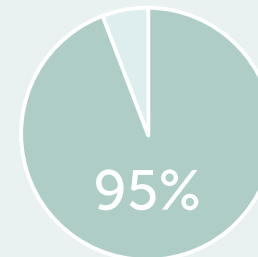

Users in a clinical study reported their skin looked smoother, plumper and brighter, and also felt firmer.

Agree their skin felt firmer after 3 treatments per week for 4 weeks

Agree their fine lines appeared less visible after 3 treatments per week for 4 weeks

Agree their skin looked brighter and plumper after 3 treatments per week for 4 weeks

# Your Skin in a Whole New Light

## Omnilux Contour™ is Different than Other Home-Use Devices

- Based on trusted Omnilux Medical™ LED technology
- Medical grade materials and testing - and backed by clinical studies
- Flexible; conforms to you for optimal comfort and results
- Optimized energy output and two wavelengths of light - red and infrared - provide professional results in a single 10-minute treatment session
- Completely portable and lightweight, with a rechargeable mobile controller
- Combine with your favorite skincare or today's most popular aesthetic treatments for optimal results

## Harness the Power of Medical Grade Light Therapy

The powerful benefits of light therapy are widely recognized in modern medical aesthetics. Omnilux, the world leader in medical LED light therapy devices, introduces the first home-use device based on its proven medical heritage and technology. Omnilux Contour™ is a non-invasive treatment for reducing fine lines and wrinkles - and providing impressive anti-aging results with no pain, side effects or downtime. Omnilux Contour is FDA-cleared as both safe and effective, insuring the same trusted Omnilux quality valued worldwide for nearly 20 years.

The proven benefits of professional-grade light therapy are now available to you in convenient, comfortable, affordable, and easy to use home-use devices.

## Backed by clinical studies and nearly 20 years of professional medical experience.

Before

After

After two weeks/eight treatments of Omnilux Contour (frown lines treated with Xeomin). Visible improvement in texture, tone and firmness.

## Omnilux Contour

The only home use LED devices based on the gold standard professional Omnilux Light Therapy System, Contour has been clinically proven to reduce fine lines and wrinkles, improve skin tone and smoothness, and enhance overall skin health.

### Omnilux Contour™ FACE

Contour FACE uses proven Omnilux LED technology to reduce facial fine lines and wrinkles and visible signs of aging.

### Omnilux Contour™ NECK & DÉCOLLETÉ

Using the same dual wavelength technology as Contour FACE, Contour NECK & DÉCOLLETÉ provides skin rejuvenation benefits to the neck and chest area.

### Omnilux Contour™ GLOVE

Hands are often the most sun-damaged area of the body. Reduce the appearance of sun-spots and aging skin by treating your hands to the clinically proven anti-aging benefits of Omnilux light therapy.
